on House restoration

ovated and restored the 1906 W.T. Bolton house by architects Charles and Henry Greene in
a, California. The house had been modified and enlarged several times over the decades, and
the original features were lost. Wherever possible we recovered the Greenes' original designs.
the interior could be restored, but the living room, entry terrace, and kitchen had to be rebuilt.
igns were based on the 1906 house, or modeled on other Greene & Greene precedents.
