

What We Do

Blackboard Mobile Learn: Most of Blackboard delivered to your mobile device!

Blackboard Mobile Learn brings two-way teaching and learning to mobile devices and gives full access to course information. Designed specifically for the iOS®, Android™, BlackBerry®, and webOS® mobile platforms, students can check grades and assignments, view documents, create discussion and blog posts, and much more. Instructors can also post announcements, upload content to courses, and comment on Discussions, Blogs, Journals.

Blackboard Mobile Learn Features:

See <https://www.blackboard.com/Platforms/Mobile/Products/Mobile-Learn/Features.aspx> for more about features.

Blackboard Mobile has been running as a pilot at SDSU since Spring 2012. In that time, over 18,000 unique users, many of them on iOS devices, have taken advantage of Blackboard Mobile's features.

Students, educators, and staff can download the app through the App Store and Google Play or by scanning the codes below:

1. Visit the app store and search for Blackboard Mobile Learn
2. Download and install the app
3. Search for your school "CSU San Diego"
4. Login using your regular Blackboard username and password
